PEELINER™
by lil vans, llc

Question: How many people does it take to remove the manufacturer car seat liner for cleaning?

Answer:

Step 1. Both Mommy & Daddy: ½ hr for Daddy to take the car seat out, 2 + hours along with the manual and aggravation to remove the liner.

Step 2. Repeat Step 1 in reverse to put it back on.

Now with our Peeler all it takes is less than 5 Minutes to strap on and take off.

Features:

- ❖ A three-layer fabric liner constructed in a unique shape: (1) an upper designed fabric layer (2) a 100% brushed polyester layer that draws moisture away from the baby, (3) and a durable polyurethane-laminate under-layer to prevent leakage to the original car seat liner.
- ❖ Elastic straps to attach the liner to the car seat in four (4) corners.
- ❖ Two available buckle slots for the buckle to pull through for strapping the child in the seat.
